About Us

Thank you, for taking the time to read this.
I'm Padmapani, and I make things happen here at Minimum Code Culture.

Four areas I provide value for SMBs:

- Website Design & Development: We design and develop website for your business with a 3-year uptime guarantee, or money back.
- Done For You Single Page Website: Don't have Capital to spend on a website, don't worry, we got you covered. Just sign up for a single-page website program, where we use premium templates to design, customize and publish your website on the internet.
- High Converting Landing Page Offer: Having a website itself doesn't get you customers. You have to drive traffic to a landing

page on your website to convert them into paying customers. We can help you craft a great offer with an awesome landing page.

- Website Maintenance: I can't stress this more enough, please get a maintenance package, it keeps your website functional, up, running and in good-health.

TESTIMONIALS

We love our clients from all over the world.

"Someone recommended I use MCC to design my website and now I understand why.

I asked for a very, very quick turnaround (which I didn't think would be possible) and they delivered completely."

"We've had great experience with MCC!

Love their ability to update photos and tweak wording on our website within minutes. Excellent communication and follow-up."

"We have been working with MCC for years and we couldn't be more happier.

Their technical capabilities are fantastic; they always provide quick response times."

"At first I was really skeptical about the timeline of the project.

But as we progressed, their Project Manager fast-tracked the process and delivered us on-time. I'm really Impressed."
